NDBIB - CRISIL 3 Year T-Bond Index

About the Index

NDBIB – CRISIL 3 Year T-Bond index seeks to capture the performance of T-Bonds in Sri Lanka's government securities market with residual maturity of around three years

Features

- **Inception Date** : October 02, 2009
- **Total return index**: Seeks to capture the price, accrual and coupon cash-flow return
- **Daily index values**: Index values available on a daily basis
- **Monthly rebalancing**: Index constituents rebalanced on the first day of every month

Key Characteristics

- **History**: NDBIB – CRISIL 3 Year T-Bond index has an inception date of October 02, 2009
- **Liquidity**: The index seeks to capture the movement in a portfolio consisting of liquid government securities
- **Replicability**: The index constituents are valued on a daily basis. This lends the index a realistic approach with valuations close to market levels

Methodology

- NDBIB – CRISIL 3 Year T-Bond index is rebalanced on a monthly basis, on the first day of every month
- Securities with residual maturity between 2 to 4 years are shortlisted and top 3 benchmark securities are selected, subject to availability¹
- The top 3 benchmark securities are identified based on polls received from market participants conducted during the week prior to the rebalancing date. If two securities have the same rank in terms of number of polls, the security with a higher amount outstanding is selected to be a part of the index.
- Weight for a security is defined as the market value of that security expressed as a percentage of the aggregate market value of all securities forming a part of the index
- Securities forming a part of the index are valued on a daily basis using two-way quotes by polling market participants and the daily report published by the Central Bank of Sri Lanka (CBSL)
- Day convention used for the index is Actual/Actual

¹ Prior to November 2013 the residual maturity criteria was 2.5 to 3.5 years
