Notes forming part of financial statement

1 Nature of Operations

The Company is in the business of providing Researched Data Processing services

1.1 Basis of Preparation of Financial Statement

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India ('Indian GAAP'). The Company has prepared these financial statements to comply in all material respects with the mandatory accounting standards notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules 2014. The Financial Statements have been prepared under the historical cost convention on an accrual basis. The accounting policies applied by the company are consistent with those used in the previous year.

All the assets and liabilities have been classified as current or non-current as per the company's normal operating cycle and other criteria set out in Schedule III to the Companies Act, 2013. Based on the nature of products and time between the acquisition of assets for processing and their realization in cash or cash equivalents, the company has ascertained its operating cycle as twelve months for the purpose of current / non-current classification of assets and liabilities.

2 Summary of Significant Accounting Policies

2.1 Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting year end. Although these estimates are based upon management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future

2.2 Fixed Assets

Fixed assets are stated at cost, less accumulated depreciation and impairment losses if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Items of fixed asset held for disposal are stated at lower of the net book value and net realisable value and are shown under other current assets.

Intangible assets acquired separately are measured on initial recognition at cost if it meets criteria, in line with accounting standards

26. Cost of Internally generated intangible assets, during development phase, is capitalised. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any

2.3 Depreciation

Based on internal assessment and independent technical evaluation carried out by external valuers the management believes that the useful lives best represent the period over which management expects to use these assets. Hence in certain class of assets, the useful lives is different from the useful lives prescribed under Part C of Schedule II of the Companies Act, 2013. The estimated useful life coincides with the useful life on which depreciation was provided in earlier years. Depreciation is provided on written down value method over the useful life of assets

Assets	Rates (WDV)	Schedule II rate (WDV)
Furniture & Fixtures	18.10%	25.89%
Office Equipments	13.91%	45.07%
Computers	40.00%	63.16%
Vehicles	25.89%	31.23%

Leasehold Improvements are amortized over the lease term or useful life of the asset, whichever is lower
Intangible assets are amortised over a period of 1-3 years

2.4 Impairment

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use.

After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

2.5 Operating Leases

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased items are classified as operating leases. Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term

2.6 Investments

Investments that are readily realisable and intended to be held for not more than a year are classified as current investments. All other investments are classified as long-term investments. Current investments are carried at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognise a decline other than temporary in the value of the investments.

2.7 Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Income from Operations

Income from operations comprises of income from research activities carried out by the Company during the year. Revenue is recognised based on mark up over cost incurred.

Interest Income

Revenue is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable

Initial Recognition
Foreign currency transactions are recorded in reporting currency by applying to the foreign currency amounts, the monthly average exchange rates for the respective periods in which the transaction takes place.
Conversion
Foreign currency monetary items are reported using the closing rates. Non monetary items which are carried in terms of historical costs denominated in a foreign currency are reported using the exchange rate at the date of transaction.
Exchange Differences
Exchange differences, arising on settlement of monetary items or on Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognized as income or as expense in the year in which they arise.
Non-monetary items carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction, and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rate that existed, when the values were determined. Exchange differences arising as a result of the above are recognised as income or expense in the Statement of Profit and Loss.
- 2.10 Taxes On Income
Tax expense comprises of current and deferred. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act of 1961 enacted in India. Deferred income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.
Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realised against future taxable profits.
At each balance sheet date, the Company re-assesses unrecognised deferred tax assets. It recognises unrecognised deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realised.
The carrying amount of Deferred Tax Assets are reviewed at each Balance Sheet date. The Company writes down the carrying amount of a Deferred Tax Asset to the extent it is no longer reasonably or virtually certain, as the case may be, that sufficient future taxable income will be available against which Deferred Tax Asset can be realised. Any such write down is reversed to the extent that it becomes reasonably or virtually certain, as the case may be, that sufficient future taxable income will be available.
- 2.11 Segment Reporting Policies
Identification of segments
The Company operates in a single primary business segment - providing research services.
The analysis of geographical segments is based on the area in which there are major customers of the Company.
- 2.12 Earnings Per Share
Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the period is adjusted for events such as buy back, ESOS, etc. that have changed the number of equity shares outstanding, without a corresponding change in resources.
For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.
- 2.13 Provisions
A provision is recognised when the company has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.
- 2.14 Cash and Cash Equivalents
Cash and cash equivalents in the cash flow statement comprise cash at bank and in hand and short term investments with original maturity of three months or less.
- 2.15 Contingent Liability
A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation.
