CRISIL’s monthly indicator of food plate cost

The average cost of a thali is calculated based on input prices prevailing in north, south, east, and west India. Monthly change reflects the impact on the common man’s expenditure. The data also reveals the ingredients (cereals, pulses, broiler, vegetables, spices, edible oil, cooking gas) driving changes in the cost of a thali.

Cost per thali was falling since October 2022, but inched up sequentially last month

- The cost of veg and non-veg thali alike, on the decline since October 2022, nosed up on a sequential basis in May 2023
  - The cost of veg and non-veg thalis declined 9% and 4% on-year, respectively, in May due to steep decline in prices of vegetables and cooking oil, which account for ~25% of the total cost of a veg thali, but increase in prices of cereals, pulses, chicken, and eggs capped the reduction
  - The decline in thali cost was supported by an on-year decline of ~35% in vegetable prices and 19% in cooking oil prices in May
  - High prices of wheat, which spurted 8% on-year in May, has limited the decline in thali cost
  - Prices of rice and pulses inched up 10% and 4% on-year, respectively, in May 2023, preventing further decline in the cost of a veg thali
  - Broiler prices are estimated to have risen by up to 2% on-year, limiting the decline in non-veg thali cost to a slower 4% on-year in the month
  - However, month-on-month, chicken prices are estimated to have risen 5-7%, leading to ~4% increase in non-veg thali cost

Note: Numbers indicate cost per thali. A veg thali comprises roti, vegetables (onion, tomato, and potato), rice, dal, curd, and salad. For non-veg thali, chicken has been considered instead of dal. Broiler prices for May 2023 are estimated (E).
About CRISIL Market Intelligence & Analytics
CRISIL Market Intelligence & Analytics, a division of CRISIL, provides independent research, consulting, risk solutions, and data & analytics. Our informed insights and opinions on the economy, industry, capital markets and companies drive impactful decisions for clients across diverse sectors and geographies.

Our strong benchmarking capabilities, granular grasp of sectors, proprietary analytical frameworks and risk management solutions backed by deep understanding of technology integration, make us the partner of choice for public & private organisations, multi-lateral agencies, investors and governments for over three decades.

About CRISIL Limited
CRISIL is a leading, agile and innovative global analytics company driven by its mission of making markets function better.

It is India’s foremost provider of ratings, data, research, analytics and solutions with a strong track record of growth, culture of innovation, and global footprint.

It has delivered independent opinions, actionable insights, and efficient solutions to over 100,000 customers through businesses that operate from India, the US, the UK, Argentina, Poland, China, Hong Kong, UAE and Singapore.

It is majority owned by S&P Global Inc, a leading provider of transparent and independent ratings, benchmarks, analytics and data to the capital and commodity markets worldwide.
