Life in Perfect Balance.

Come discover an exclusive standard of living within a lushly appointed six and a half acre oasis filled with water bodies, green spaces and entertainment areas. Welcome to OVO by LUSHlife. Located in the heart of Undri, Pune's only 100% residential neighborhood, the OVO life offers you exceptional 2, 3, and 4 bedroom residences, which blend distinct modern style with handpicked eco-friendly materials and lifestyle-enhancing details throughout.

At OVO we believe that in today's busy world a balanced lifestyle shouldn't be a luxury, it's a necessity. By focusing on techniques and materials that support the health and longevity of the residents as well as the aesthetic quality of the buildings, OVO offers the opportunity to enjoy life in truly premium apartments for exceptional value. From reflexology-embedded footpaths to natural light and ventilation, yoga and meditation rooms to designer kitchens and organic gardens, living a truly balanced life has never looked - or felt - so good.

Architect's message

"In approaching OVO, it was essential that we understand the larger environment around the property, and then work to create an elevated lifestyle based upon environmental harmony, sustainable design and the very latest standards in construction and materials.

In the units themselves, we made good ventilation a high priority, as well as softening the line between indoors and outdoors by creating terraces and balconies, which are also great buffers to beat the extremes of climate. This brings a little bit of the outside in – a great way to retain that feeling of freshness after a busy day.

In the larger exterior elements of OVO, we approached the aesthetics by advocating a simple facade constructed from materials

like steel, glass and wood - combined in clean smooth lines. However, with OVO we also looked beyond the visual. We performed an analysis of the sun and wind patterns and concluded that an external dry cladding treatment would serve as an ideal insulator; retaining warmth in the winter and offering natural cooling in the warmer months.

Indoors and outdoors, we took these concepts to heart and created a sustainable way of life and community, which honors the health, well being, and enjoyment of every resident and their guests with minimal environmental impact. We look forward to seeing OVO evolve into a dynamic example of what is possible for luxury green living."
