1 crore = 10 million

Refer to Annexure for Details of Instruments & Bank Facilities

# **Detailed Rationale**

CRISIL Ratings has assigned its 'CRISIL BBB-/Stable/CRISIL A3' ratings to the bank facilities of K J International (KJI).

The rating reflects KJI's extensive industry experience of the promoters, sound operating efficiencies and comfortable debt protection. These strengths are partially offset by its susceptibility of operating margin to volatility in raw material prices, and vulnerability to cyclicality in the steel industry, moderate working capital cycle.

## **Analytical Approach**

Unsecured loans of around Rs 26.04 crore are from promoters and related parties and are expected to remain over the medium term and are hence treated as 75% equity and 25% debt.

# Key Rating Drivers & Detailed Description

### Strengths:

**Extensive industry experience of the promoters:** The promoters have an experience of over a decade in Steel - TMT/ Rolled/ Structural products industry. This has given them an understanding of the dynamics of the market which has lead to a year on year increase of sales of 30% in Fiscal year 2022 from fiscal year 2021, and enabled them to establish relationships with suppliers and customers.

**Sound operating efficiencies**: KJI has healthy operating efficiencies, marked by healthy return on capital employed (RoCE). Driven by high economies of scale and experienced management the operating margins have been ranging at around 5.51-7.31% in the last three fiscals ending fiscal year 2022.

**Comfortable debt protection:** KJI's debt protection measures have been at comfortable level despite leverage as indicated by modest TOL/TNW of around 4.34 times as on 31<sup>st</sup> march 2022 which is expected to improve to around 3.86 times in FY 23, with improvement expected in networth of the company. The interest coverage and net cash accrual to total debt (NCATD) ratio are at 4.74 times and 0.15 times for fiscal 2022 these are expected to be around 4.78 times and 0.15 times respectively in FY 23 whereas the networth stands at around Rs. 22.28 crore as on 31<sup>st</sup> march 2022. KJI debt protection measures are expected to remain at similar level over medium term.

### Weakness:

Susceptibility of operating margin to volatility in raw material prices, and vulnerability to cyclicality in the steel industry: Cost of production and profit margin are heavily dependent on raw material prices (sponge iron and mild steel scrap). On account of variation in raw material prices, operating margin has also been volatile. Furthermore, profitability is linked to the fortunes of the inherently cyclical steel industry, which has strong correlation with overall growth in gross domestic product. Operating performance will remain susceptible to volatility in raw material prices, and offtake by key user sectors.

**Moderate working capital cycle:** Its moderate working capital management is reflected in its gross current assets (GCA) of 141 days as on March 31, 2022. It is required to extend long credit period in line with the industry standards. As, the customers are small and medium size player who require credit. Furthermore, to meet its business requirement, it hold large work in process & inventory.

# **Liquidity: Adequate**

Bank limit utilisation is moderate at around 66.45 percent for the past nine months ended Sep-22. Cash accruals are expected to be over Rs 8.95 crore which are sufficient against term debt obligation of Rs 2.02 crore over the medium term. In addition, it will be act as cushion to the liquidity of the company.

Current ratio is healthy at 1.38 times on March31, 2022 The promoters are likely to extend support in the form of equity and unsecured loans to meet its working capital requirements and repayment obligations.

# **Outlook: Stable**

CRISIL Ratings believe KJI will continue to benefit from the extensive experience of its promoter, and established relationships with clients.
