

## Rating Update

January 31, 2022 | Mumbai

# Marg Techno Projects Limited

**Update as on January 31, 2022**

This update is provided in continuation of the rating rational below.

The key rating sensitivity factors for the rating include:

### **Upward factors**

- \* Stable asset quality, with gross non-performing assets (GNPAs) consistently below 1.0% over the medium term
- \* Improvement in scale of operations with gearing remaining below 3 times
- \* Sustained improvement in the earnings profile, with return on assets maintained at 2%

### **Downward factors**

- \* Moderation in the capitalisation metrics, with significant jump in gearing to over 5 times while scaling up the portfolio
- \* Any adverse movement in the asset quality, with GNPAs weakening the earnings profile

CRISIL Ratings has a policy of keeping its accepted ratings under constant and ongoing monitoring and review. Accordingly, CRISIL Ratings seeks regular updates from companies on the business and financial performance. CRISIL Ratings is, however, awaiting adequate information from Marg Techno Projects Limited (Marg Techno) which will enable us to carry out the rating review. CRISIL Ratings will continue provide updates on relevant developments from time to time on this credit.

CRISIL Ratings also identifies information availability risk as a key credit factor in the rating assessment as outlined in its criteria 'Information Availability Risk in Credit Ratings'.

## Rating Rationale

December 31, 2020 | Mumbai

### Marg Techno Projects Limited

*'CRISIL B+/Stable' assigned to bank debt*

#### Rating Action

<b>Total Bank Loan Facilities Rated</b>	<b>Rs.15 Crore</b>
<b>Long Term Rating</b>	<b>CRISIL B+/Stable (Assigned)</b>

1 crore = 10 million

Refer to annexure for Details of Instruments & Bank Facilities

#### Detailed Rationale

CRISIL has assigned its '**CRISIL B+/Stable**' rating to the long-term bank facility of Marg Techno Projects Limited (Marg Techno).

The rating reflects Marg Techno's low vintage in gold loans and lack of diversity in the resource profile. The company ventured into gold loans only since fiscal 2018; prior to that, it offered various other loans. Currently company has funding from only one bank, and with growth in its operations, it will have to tap other banks and non-banking financial companies (NBFCs) to meet its funding requirements.

These weaknesses are partially offset by the company's adequate capitalisation; the capital position is adequate for the current scale of operations with networth of Rs 5.7 crore and gearing at 2.9 times as on September 30, 2020. Marg Techno has not raised significant equity capital since fiscal 2016, and the gearing has steadily gone up to 2.9 times as September 30, 2020, from 0.1 time as on March 31, 2017. Hence, the company's ability to maintain gearing in accordance with growth will remain a key monitorable.

In light of the regulatory measures announced by the Reserve Bank of India (RBI) under the Covid-19 Regulatory Package, lenders were permitted to grant moratorium on bank loans. Marg Techno, however, has not opted for any moratorium.

#### Analytical Approach

The team has evaluated the standalone credit risk profile of Marg Techno.

#### Key Rating Drivers & Detailed Description

##### Weakness:

##### \* Low vintage in the gold loan segment

The company has been operational for two and a half decades. Earlier, it was engaged in business, personal and various types of other loans. However, in fiscal 2018, it ventured into gold loans, and its portfolio has grown significantly only in the first two quarters of fiscal 2021. Assets under management (AUM) grew 124% between March and September 2020. The management plans to focus only on gold loans over the medium term. As the loan book is scaled up, ability to maintain performance asset quality and profitability will remain key monitorable.

##### \* Lack of diversity in the resource profile

Marg Techno is highly dependent on funding from only one bank at the current point in time. The company has availed of an overdraft facility from Federal Bank, with a sanctioned limit of Rs 15 crore. As per the terms of the facility, the gold pledged with Marg Techno is re-pledged with Federal Bank as collateral. Marg Techno, through its loan agreement, takes rights from the borrowers for sale/transfer/re-pledge of the underlying gold in order to keep it in surety and have absolute rights to take a loan on it. At present, the company does not have any other source of funding. Therefore, with rise in revenue, the company will have to tap other avenues. Marg Techno's ability to diversify its resource profile and raise loans from other banks and NBFCs will be critical to fund future growth and, hence, will be a key monitorable.

**Strengths:****\* Adequate capitalisation**

Marg Techno's capital position is adequate in relation to its scale and nature of operations. As on September 30, 2020, the company had networth of Rs 5.7 crore and comfortable gearing at 2.9 times which increased from Rs 5.5 crore and gearing of 0.9 time as on March 31, 2020. Furthermore, as the gold loan segment contributes a major portion of the AUM, reduction in asset-side risks (security of gold, which is liquid and is in the lender's possession) supports capitalisation. Marg Techno should remain adequately capitalised, with comfortable gearing over the medium term.

**Liquidity Stretched**

The company does not have any specific policy to maintain liquidity. As on November 10, 2020, it had total cash and bank balance of Rs 0.53 crore. The company has borrowing only from one bank, for which it has bullet repayment. Marg Techno's liquidity buffer to cover its debt obligation, including operating expenditure for the next three months, stood close to 2 times. The company's collection efficiency improved from July 2020 onwards; in August and September 2020, it had collections of 95% and 96%, respectively.

**Outlook: Stable**

CRISIL believes Marg Techno will continue to benefit from its experienced management and increase in revenue in the near term.

**Rating Sensitivity factors****Upward factors**

- \* Stable asset quality, with gross non-performing assets (GNPAs) consistently below 1.0% over the medium term
- \* Improvement in scale of operations with gearing remaining below 3 times
- \* Sustained improvement in the earnings profile, with return on assets maintained at 2%

**Downward factors**

- \* Moderation in the capitalisation metrics, with significant jump in gearing to over 5 times while scaling up the portfolio
- \* Any adverse movement in the asset quality, with GNPAs weakening the earnings profile
